Shanna's Comments about the David Huggins Breeding Program in New York City.

September 2019

I was interested in Shanna opinion about the book, “LOVE IN AN ALIEN PURGATORY, The Life and Fantastic Art of David Huggins”. The book is written by Farah Yurdoze and published by Anomalist Books, 5150 Broadway #108, San Antonio, TX 78209. Like The Stan Romanek Breeding Program I share some common denominators with both Stan and David Huggins. The major difference being that their programs are run by ET brotherhoods outside of our solar system; whereas, my program is run from within the solar system by the space brothers. That being said I'll get right to Shanna's edited comments.

10-25-2019
Shanna's says: The giant praying mantis dude is an illusion. He is a glamour astral influence. Not real. Created in David Huggins' mind. However, some of the grays are real. Crescent is 3 different ET females from Mars. David was not inserted with an implant in his nostrils. Waves were used to take away his fake pain. Event cause emotional unbalance. David Huggins is not a contactee in the traditional sense. Contact is one way. Contact is ET to David. Not two way back and forth. David has no soul contact. No training in occult. Strictly one way contact. His purpose is to help with Master's emergence on to the world stage by attracting attention. David is not telepathic. David is a low level contactee. No abductions. His soul had volunteered at the soul level. He has had some children 4 or 5 I think. The 60 children statement is false. He has had contact with the children. David truly believes his experiences are real. No medical or genetic procedures were done to David Huggins. He was taken onto a UFO as a child. Later on in NYC, David did not go on board a UFO from his apartment. David Huggins is very good person. David did go on board a UFO the 1st Time. David's nose bleed was a stigmata syndrome reaction. (Placebo Effect - Mind/Body Reaction) As a boy David did see a Landed UFO from Mars. This metallic craft was shinny with a mirrored like surface and is a true event. The large black snake event as a boy is also a true event. David was not chased by an oval of light as a boy. The ET sitting at the tree event was true. The Egg shaped UFO on the ground behind the tree event was true but he didn't go inside the UFO. The baby in a tube event is true but that happen on another date, not at the time when the egg shaped UFO was behind the tree. When David moved from Pauldin County to Acworth County Georgia a UFO did follow. That UFO was also testing soil samples at the time for toxins. Crescent, one of three ETs did have sex with David for the first time in the woods when he was 17. David's 1st sexual experience led to a baby. The reasons David didn't have any memories till later was to protect David mentally.

10-28-2019
Shanna's says: The transportation strike in NYC where David hitchhike and a woman in a black car stopped and gave him a ride home is true. Also, the nightly sex sessions with Crescent in David's room is true, but it was not the same ET female person each time. It was one of the 3 ET females. They took turns. The main difference between David's program and our breeding program is ours is run from within our solar system whereas, David's is run from outside our solar system. Moreover, David Huggins “your baby is dying” event did not happen. It was a test to see how he would respond. The ETs needed to find out if David truly love these children. The

underground meeting with Crescent, the Greys, Mantis and the other Female ETs was real. However, all of this was not in the solid physical state but rather in the etheric physical state. Shanna confirmed that David is a contactee but not all of his contacts are real. Some contacts were due to mental-emotional issues. However, most of the contacts were real. David is in 24/7 contact currently. He doesn't share this with people but know it within himself to be true.
